

# Your Clear Choice for Western Red Cedar.

Pacific Western Wood Works covers 2.5 acres in Delta, BC, producing over 6 million board feet of WRC products annually. We have expanded our dry warehouse space to over 37000 sq. ft.

## Who are we? What are we? What do we do?

For close to two decades Pacific Western Wood Works, a BC owned and operated family run business, has provided quality products and innovative solutions for the WRC industry. Our hands-on way of doing things with an emphasis on personal service is a reflection of our founder, Ian Wight. Aided by his sons, his thirty years of experience in the industry provides the basis for how we approach and handle our business.

## Pacific Western Wood Works... Getting it done. Getting it done right.

We take personal pride in every aspect of our manufacturing. We're big enough to handle the large orders, yet flexible enough to take care of small runs and custom demands. The craftsmanship and quality is obvious, the result of using higher standard materials and taking the extra steps to do things right. Our versatility and responsiveness sets us apart. We're always searching for new products to offer and improved methods of production. That way we can provide just what customers want, and you have a constantly expanding and improving WRC program.

# There's more! Our Lumber and Pergola lines can expand and complement your WRC sales programs.

## Dimensional Lumber

We're the Western Red Cedar Specialists with wide capabilities.

With the installation of our moulder, Pacific Western Wood Works has become a premier supplier of dimensional lumber. It's another demonstration of our versatility, innovation and superlative quality standards. There's always something new to catch the customers' eyes. And what they see are the right products for their needs, with each size and shape offering new applications.

- WRC boards and fencing
- Dimensional lumber for heavy duty use: 2" x 2" to 2" x 6"
- Lath strips - Use as manufacturing material or for home gardens.
- Laminating capabilities - New glues open up the possibilities. Bring us your ideas!
- Balusters - Different trims and mitres mean so many applications.
- Custom Runs - We can run your wood to your specs.
- Pointed Garden Stakes

## Pergolas

Expanding living space into the outdoors - made easy. Introducing the new Pergola system from Pacific Western Wood Works.

Our renowned quality and craftsmanship have taken a creative turn with our Pergola line. It's durable... modular...and setting the new benchmark in the garden furniture industry for the 2000's. It's also versatile. Pacific Western Wood Works has designed this program to adapt to your specifications. Tell us what your customers want and we'll customize our kits to suit your market.

Pergolas are the affordable do-it-yourself product that unleashes creativity. The result? Beautiful, usable living space in the great outdoors of the backyard.

# Pacific Western WOOD WORKS

manufacturing quality craftsmanship personal service

# Your clear choice for Lattice.

- a) WESTERN RED CEDAR**  
WRC - Our premium line. Elegant, lasting beauty with natural resistance to weather, rot and insects.
- b) TREATED**  
CCA - CCA pressure-treated Spruce-Pine-Fir. Your low cost, functional alternative.
- c) UNTREATED**  
SPF - Untreated Spruce-Pine-Fir, ready for painting or treating.

## Species

**1.** We recommend WRC as your #1 choice for outdoor use. WRC's natural, protective resins mean there are no chemicals to leach into the soil. Our manufacturing diversity also allows us to offer untreated S-P-F and CCA treated lath. These are not as long lasting as WRC, but still available in many sizes.

## Grade

**2.** At PWWW we restrict our quality to two superior grades:

- Clear (no knots) and
- STK (sound tight knots).

(Note: There is no prior selection for clear. We do not pull our clear from the STK grade.)

We've been making lattice for over 17 years. You can see for yourself that our lath quality is among the best in the world.

## Sizes

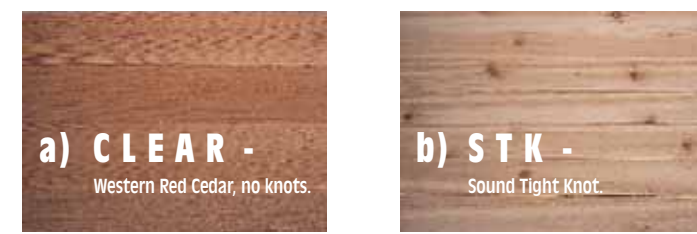

**6.** Panel dimensions are really only restricted by your imagination. From the North American standard of 4' x 8', to custom 1' x 3', or... whatever! We can do it all.

## Our Advantage

We're the clear choice because:

- We specialize in premium WRC
- We offer lots of choices, plus unlimited custom possibilities
- We're experienced; we've been making lattice for over 17 years
- We have our innovative **Alumiglue** system for superior lattice
- We utilize a comprehensive 6-step quality control system
- We use superior materials, and superior manufacturing methods
- We use cardboard corners under strapping to protect your order
- We put custom bags over our lattice lifts to provide protection from weather and damage
- We mark every lift in three places with unique tags for easy identification (helps with inventory control, shipping and delivery)
- We bar code each individual sheet by customer request

## Thickness

**3.** Our most popular thicknesses:

- Standard 7/32"-6mm
- X-Thick 5/16"-9mm (minimum order)
- Jumbo 7/16"
- XX-Thick 3/4"-18mm (special order)

## Fastening

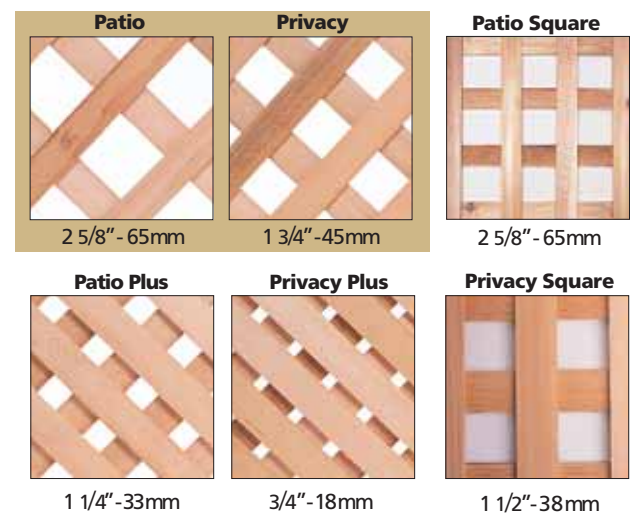

**4.** A few years ago we introduced our innovative **Alumiglue** system featuring waterproof glue at every intersection and toe-nailed aluminum staples that only show on the front face. It's safer, looks better and it's much stronger. Our **Alumiglue** lattice can handle the handling with drastically reduced breakage, and no problems with staple staining.

## Alumiglue

## Spacing

**5.** Our choices allow you to select the style and degree of privacy right for your applications. (Note: dimensions listed are between laths, not centre to centre.)

## Framed Lattice

**7.** **a) 1' x 2' Sandwich Style** Save time and money. They're preassembled & ready to take home. You don't even need a nail gun.  
**b) 2" x 2" Frames** CLR cedar frame - lattice just slips into the groove. It's the strong, sturdy, superior alternative. More attractive, higher quality, and less susceptible to warping.

**Laminated Frames:** Laminated cedar - more possibilities, and you don't have to think along straight lines. We do laminates with curves, and can create ready-to-use panels in various designs.

## Mouldings

**Caps (frame) & Divider (joiner)**  
If our standard size panels work for you, that's great. If not, use our Caps and Dividers system. It's the easiest way to join two pieces of lattice together, it's stronger, and can be a real time saver. (Plus, you're not shipping air.)

They're available in many lengths, and also available with mitred ends, double end trimmed or as accurate as precision end trimmed. We carry three standard groove sizes, but tell us what you need. We can manufacture to your personal application!

Suggestion: Caps can also be used as hand rails or frames for your custom projects.
